SUMMARY

I am a Full Stack Engineer with expertise in building projects with React and Redux. I have a passion for JavaScript libraries and have spent the last several months completely immersed in remote development, building everything from simple JavaScript web pages to bigger React applications. I have developed extensive knowledge in Front-End technologies such as JavaScript, React, Redux, Angular, jQuery, HTML5, and CSS3. I also have experience in Back-End technologies such as Ruby, Rails, Python (Programming Language), Django REST Framework, and MySQL, PostgreSQL, SQL as well as tools and methods like Git, GitHub, Netlify, and Mobile/Responsive Development. I am skilled in remote pair-programming, teamwork, and mentoring. I am available for full-time, remote work and am willing to relocate.

SKILLS

Front-End: JavaScript, React, Redux, jQuery, HTML5, CSS3, Sass

Back-End: Ruby, Rails, Python (Programming Language), Django REST Framework, MySQL, PostgreSQL

Tools & Methods: Git, GitHub, Heroku, Netlify, Render, Mobile/Responsive Development, TDD, RSpec, Capybara

Professional: Remote Pair-Programming, Teamwork, Mentoring, Project Management

EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS

Full-Stack Web Developer

Remote
March, 2022 – Present

[Rest Country API](#) – Rest Country api is a react redux application based data fetched from rest countries api. The application allows user to filter information by different continents.

- Built with: HTML, CSS, JavaScript, WEBPACK, and rest countries-APIs-v2.

[Food Recipe App](#) – The Recipe app keeps track of all your recipes, ingredients, and inventory. It will allow you to save ingredients, keep track of what you have, create recipes, and generate a shopping list based on what you have and what you are missing from a recipe. Also, since sharing recipes is an important part of cooking the app should allow you to make them public so anyone can access them.

- Built with: Ruby, Rails, PostgreSQL

[Budget App](#) – Exploration Getaways is a traveling application where the user can register new accounts, log in and book a set of different trip packages. It is built and connected by using two different repositories, including the back-end and the front-end.

- Built with: Ruby, Rails, Render, and Swagger.

MICROVERSE

Mentor (Volunteer)

Remote
March, 2022 – Present

- Mentored 3+ junior web developers, providing technical support through code reviews.
- Developed 10+ side projects with mentees for improving technical and collaboration skills.
- Provided advice and tips on how to maintain motivation to maintain longevity in the program.
- Proposed improvements to code organization to improve code quality and overall performance.

Viragoes, Remote

Frontend Developer

Atlanta, Georgia, United States
September 2021 – February 2022 (6 months)

- Worked as a productive and positive team member to design, code, test, report, and debug operations.
- Successfully identified, diagnosed, and fixed website problems, including broken links, typographical errors, formatting, images, and layout.
- Assessed UX and UI designs for technical feasibility.

HabeshaExpress Nairobi, Kenya
Frontend Developer March 2021 - December 2021 (10 months)

- Responsible for maintaining, optimizing, troubleshooting, and improving websites
- Implemented a new, responsive, mobile-first approach and strategy to standardize all output
- Assessed UX and UI designs for technical feasibility
- Collaborated with product team members to implement new feature developments
- Key achievement: Implemented a new responsive, mobile-first approach which increased mobile traffic by 20%.

Web Host Africa Ltd Nairobi, Kenya
Software Engineer February 2019 - March 2021 (2 years 2 months)

- Involved in developing and maintaining web-based applications
- Collaborated with the team to ensure timely delivery of projects
- Implemented new features and functionalities to enhance user engagement
- Responsible for troubleshooting and resolving technical issues

EDUCATION

MICROVERSE March, 2022 – December, 2022
Remote Full Stack Web Development Program, Full Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair-programming using GitHub, industry-standard gitflow, and daily standups to communicate and collaborate with international remote developers.

Eritrea Institute of Technology September 2010 - July 2015
Degree: Bachelor of Science in Computer Engineering

- Completed a Bachelor of Science in Computer Engineering at Eritrea Institute of Technology
